

BURDENS
a **WOLSELEY** company

The Civils and Utilities Experts

THE *ESSENTIAL* PRODUCT GUIDE

Welcome to **THE *ESSENTIAL*** **PRODUCT GUIDE**

Our most comprehensive guide ever

Featuring more than 7000 products over 438 pages the Essential Guide is the definitive, easy to use guide packed full of invaluable product and technical information for the Civils and Utilities market.

The handy size format is easy to navigate and categorised by Civils, Utilities and MCA hire (the experts in pipe jointing equipment for hire and repair).

If you still can't find what you're looking for, contact us or visit your local branch and we'll be happy to assist with any product or technical requests.

The Burdens promise

We understand the importance of keeping projects on schedule. And that means getting the right materials, to the right place, at the right time... *Every time.*

This ethos is underpinned by a continual commitment to putting our customers first, with the emphasis firmly on:

- Great service
- The right stock
- Expert staff

Introducing Fusion Provida UK, Fusion Hire & Repair, Utility Power Systems and Utility Fibre Systems

Fusion Provida UK, Fusion Hire & Repair, Utility Power Systems and Utility Fibre Systems are suppliers of utility infrastructure products and pipe jointing equipment hire that distribute a range of products and equipment to utility contractors.

With almost 200 employees, the businesses operate from 11 depots around the UK, including a National Distribution Centre and National Sales Office in Chesterfield, Derbyshire.

Fusion Provida UK, Fusion Hire & Repair, Utility Power Systems and Utility Fibre Systems perfectly compliment the Burdens business, and their great customer service and expertise also fit well and help to fulfil Burdens potential in the infrastructure and utilities marketplaces.

Delivering the UK's water and energy

Fusion Provida UK is the UK's leading supply chain partner for utilities and utility infrastructure providers. We work closely with contractors involved in private gas, water and electricity networks on industrial, commercial and domestic developments.

Based centrally in Chesterfield, we have an extensive depot and logistics network around the UK to meet the needs of customers quickly and professionally.

We supply products for

- Multi-utility projects
- Gas infrastructure
- Water infrastructure
- Electricity infrastructure
- Butt fusion and Electrofusion
- Polyethylene fabrication

Our services include

- Effective and dynamic material management
- Polyethylene fabrication
- BOMs from scheme drawings

Butt fusion and electrofusion products for hire and repair

Fusion Hire & Repair boast the largest fleet of butt fusion and electrofusion pipe jointing equipment in the United Kingdom - almost 2,000 machines. Hire demand is serviced through a network of strategically located depots, supported by specialists staff located at our head office in Chesterfield.

Our equipment includes:

- Butt fusion machines
- Electrofusion control boxes and tooling
- Generators, shelters and drilling equipment
- WASK
- Gas detection equipment
- Moles

If you have your own pipe jointing equipment, we have a team of engineers that can repair and service it for you. We also offer a range of training options. Contact one of our team and they will be able to help you.

Making the right electrical connections

Utility Power Systems is an electricity infrastructure specialist, supplying specialist products, services and technical support to approved electrical contractors.

We pride ourselves on becoming an integral part of your team and delivering bespoke services and unrivalled customer support.

From first point of contact, our dedicated sales and technical support team work with you to identify what you need.

We supply a comprehensive range of cables, ducting, joints, terminations, fuses, accessories and consumables for both low voltage and high voltage installations.

Along with bespoke kitting and technical support, our services include cable cutting - eliminating waste, preserving cash flow and minimising the opportunity for theft.
